

Document Scanning and Indexing: Intersect Systems puts it all together!

Intersect Systems offers a scalable, affordable, integrated, state-of-the-art software system for records management that provides retention schedule development, document indexing and management, global editing, and workflow in one comprehensive system!

Index images in a variety of formats

Index electronic documents into the *RCAMS** or *RCAMS SQL* records database with Intersect's *RCAMS Image Manager* in tif, pdf, png, jpg, gif, and pcx formats. Compatible with a wide range of document scanners.

Minimize keyboarding with special features

State-of-the-Art OCR engine. Includes image group and step-through template features to minimize keyboarding, and numerous innovative indexing functions that reduce keystrokes and allow indexing while viewing each image if desired.

Easily locate and view or print imaged documents

Quickly and easily locate, and view or print, imaged documents with *RCAMS* or *RCAMS SQL*; locate, view, and print remotely through LAN or WAN access with Intersect's *Accession* or *Image Access* workflow modules on read-only remote stations.

Manage all of your records with one system

With *RCAMS* or *RCAMS SQL*, manage all of your records — paper, microfilm reels or cassettes, electronic images — with one records management system.

Create and maintain records control schedules with special editor

Create and maintain a Records Control Schedule for your organization with the *Retention Schedule Manager* module, using digital versions of the Texas State Library and Archives' Local Government Schedules and State Schedules provided by Intersect Systems.

And much more...

RCAMS and *RCAMS SQL* include numerous other capabilities designed, developed, and refined through extensive use in real records centers with Intersect customers.
